

A new report reveals shocking truths about internet business failure and why you should read it before doing anything on the internet.

Before the end of 2006, 95% of all internet marketers will shut down their businesses and cut their losses short with no single cent of profit.

Is that you?

Take a couple of minutes to read this controversial report and avoid the pitfalls which 95% of people will fall into.

1. Is your business totally dependant on a third company of which you have no control what so ever?
2. Were you given an affiliate link and have paid high signup fees in exchange for the promise of earning high easy commissions which never came?
3. Do you feel like you are overwhelmed with all the things going on, on the internet and don't know where to start?
4. Are you being bombarded with information on a daily basis by countless business opportunities and you don't know how to tell the scams from true business opportunities?
5. Are you being told by many advertising companies that they will deliver millions of hits to you and you never see a single sale?

Some of you might know me because I've been doing business on the internet for about 8 years and have talked to many of you on the phone personally or replied to your emails.

You know that I'm not a person who looks for easy money. I have spent countless hours explaining to my customers what they need to do in order to succeed on the internet with their business.

I did this **one on one** and quite often I had the feeling that I was talking in vain. The person on the other end didn't have any idea about the basics of internet business, but was diving into advanced marketing, pushed by those who didn't know any better themselves.

Keep in mind that by what I say now I'm not intending to offend anyone or make anyone feel bad.

I just want you to get realty check.

If none of these 5 pitfalls apply to you, that means that either you have not done anything on the internet yet, or you are a seasoned marketer and have experienced all that yourself already.

As I look back over my last 8 years and analyze my own development and progress, I see a new breed of internet business people who believe that internet is a medium which brings easy money, where people are anonymous and everything goes.

Check this out.

A person will contact me and tell me that I can earn \$5000 a day by signing into their business opportunity. 5 minutes later I will learn that this person is unable to spend \$5 for one month of advertising.

Do you see the problem?

An individual who can't afford \$5 and who uses my 1-800 to call me, offers me an opportunity to earn thousands daily.

This is the kind of new breed of internet entrepreneurs emerging over last couple of years.

Another time I will get a call from a customer telling me that my advertising is great but they must stop it because they have spent several thousands paying for different opportunities and promotions and nothing is coming back. They have to cut down all expenses to be able to make their ends meet.

Or a person will ask me for my advertising services and when I tell them the price, they say that for that much money they can buy thousands of hits somewhere else while I can't even guarantee any hits.

Those who guarantee thousands of hits for couple of bucks are businesses which won't be there tomorrow. Those business owners will just start a new business offering some new buzzword so that naive inexperienced marketers can fall into this.

I offer advertising which requires tweaking but brings real buyers if correctly applied because visitors from me are real visitors who elected to click on the link and visit your site. I don't use automation, pop-ups, auto-surfs or send emails to anyone who didn't join my list through a legitimate signup process.

Since you are reading my report, this tells me that you are **the** kind of person who would like to avoid the pitfalls and are interested in real internet business. It says that you are a person who wants to help others by providing the best you can offer, and that you want to get only paid if you believe that what you have to offer has value.

In fact it is your obligation to offer things which can be of benefit to those who might need it.

I'm sure that everyone can be lured into believing that there is an easy internet business, that for \$50 bucks you can reach millions of visitors and that your site can be found on top of search results of Google if you use some tricks, like creating farms of links, creating fake articles or cloak your pages.

Here comes the shocker

Are you ready?

There is nothing without work

There is nothing without value offered to your customers

There is nothing without hours of time spent on understanding the principles of marketing

There is nothing without building of relationship with your customers

There is nothing without you going the extra mile

There is nothing without being better than your competition

There is nothing without putting others interests in front of yours

If you don't like what I just said, stop reading. My report is not for you.

"Success without honour is an unseasoned dish; it will satisfy your hunger, but it won't taste good."

– Joe Paterno, football coach

Since you are reading still, let me guess.

You agree with what I said, right?

If not, than I ask that you to WAKE UP

Some people might get good temporary results without implementing those principles but the question is...

How long will they enjoy it?

Will they be able to go forever without working hard?

Maybe they were lucky once, will that happen again?

If they sold worthless products to some customers;

How many recommendations will they get from this?

How many other people will buy the product again?

How will you implement all these principles and at the same time not lose your shirt you might ask?

Will you have time to build a relationship, provide the best value for your customers, be better than your competition and put interests of others in front of yours, and still be able to generate profit?

My answer is absolutely!

I started my business as an immigrant and I did it from my basement with no extra cash. Since then my business produced over \$3 Million dollars and only recently have I hired employees to help me run it.

If I could do that as an immigrant, while I was learning the language, can you do this too?

On top of that I had two small kids 4.5 and 6 years old while I was getting my business off the ground. It definitely added to my inconveniences.

You can bet these things were not helping.

Step by step you grow what you have to offer and improve it. You add new products and open new businesses.

You keep a high standard of your work ethics and you are proud of each small accomplishment.

There will be disappointments and roadblocks on your way and you'd better be ready for this. Make sure that what you do is what you like, so you can keep going even when things don't look too good. Keep going, never stop.

***You might ask why you should take the tough route to reaching success.
You may only want to make an additional \$400 or \$500 dollars a month,
You don't want to kill yourself***

Guess what. Making \$400 a month is just as hard as making \$4,000 when you have not made any money yet.

Even making \$1 from your new venture is hard if you have not made any sales yet.

If you want to make an extra \$400 a month let's say by the end of the next six months, start working like you would want to make \$4,000,000. This is only the sure way to earn your first \$400.

Once you make your \$400 a month, you will feel like making \$4000 a month is just a matter of time.

Once you know how to earn \$400, you are creating a "**system**" which can be applied just to larger number of customers.

Did I just mention the word "system"?

This is exactly what you are looking for.

[Here's an example.](#)

For years I was trying to lose weight and I used different diets without any success. I didn't realize that the goal of all those diets was to only lose weight. Once I stopped them, my weight was back up where it was before, sometimes even higher.

I was struggling for a while and eventually I tried "**Weight Watchers**" and learned the points system. My weight started dropping gradually - [note](#) that I said "gradually" - without me feeling deprived of food.

I just needed to know the point value of each product and I could choose what I wanted to eat in order to keep my daily point level.

I realized that I needed to embrace a lifestyle which would be acceptable for me and would become my second nature if practiced long enough.

And this worked. I have my weight where I always wanted it and I don't feel I'm not eating enough. A totally unplanned effect of this diet is that I have learned how to avoid sugars and fat.

Total winner

The same applies to your business,.

You need a **system**.

What if I could show you a system to start your own bullet-proof business, test it, and learn how to promote it almost free and grow it to infinity?

How about if on top of the system, I would offer you free mentoring for three months where you would be able to learn and practice all of the steps and receive expert advice each step of the way?

Would this interest you?

Would this be risk free?

All would depend on how serious you would want to dive into the material and how thoroughly you would do your assignments.

Everybody knows it is hard to start a new business.

9 out of 10 business fold down after the first 4 years.

5 out of 10 don't even see the first year and the ones who survive are not always successful.

Now you have no excuse because I have the system for you! You can follow it to start your own successful internet based business from your basement and I can help you all the way.

I won't teach you how to put together a business plan and how to do your accounting.

I won't tell you how to calculate your source deductions and how to register a corporation.

All this is not important when you don't have a product or **even** a single customer.

You need to determine what your solution should be and know that there is a demand for it before you move your finger towards creating it.

In fact you should get orders for your product even before you have created it because you need to know it is needed.

- You can learn about dirt cheap promotion sources,

- Ways to follow-up automatically with your customers for only pennies and building trust and relationships
- You can have your business up and running in no time if you follow my tested and proven methods and techniques.
These are the same techniques, which allowed me to earn over \$3 million from my basement over last 5 years.
- You will be instructed on how to avoid the pitfalls. You won't even need to know any difficult technology.
- If you still run into roadblocks, I can show you how you can find someone who can complete those tasks for you for not more than \$20-\$50. You could spend hundreds or even thousands of dollars if you don't know these sources.

If you are still sceptical, know that over the last three months, there was not one day that would go by where I would not work on my fool proof system.

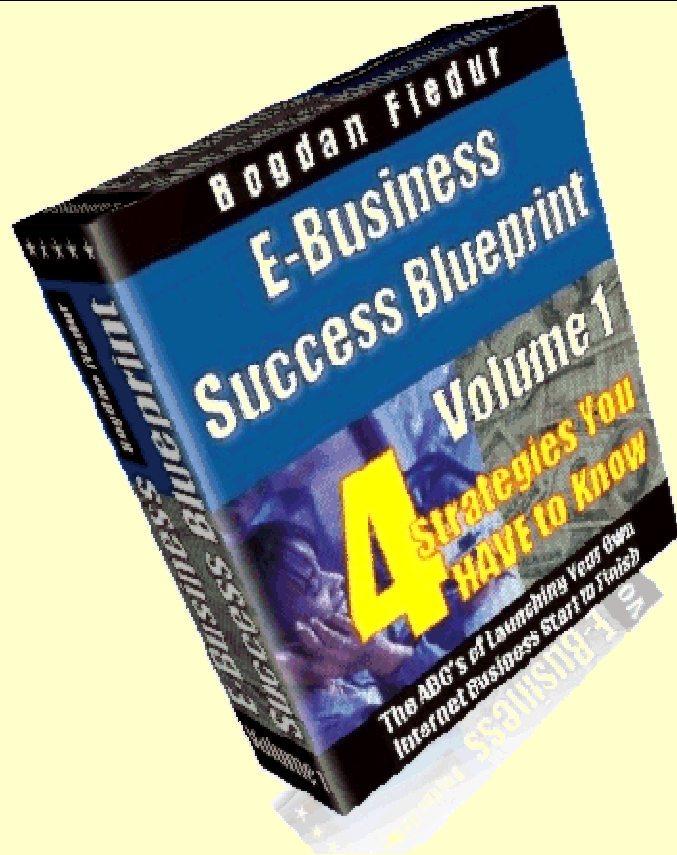

I was researching and organizing content. Making sure that even a beginner can follow it and understand. I was working with an editor and proof-reader so you can better understand the language of an immigrant.

I had a mentor call me once a week to kick my butt and get things done on time.

I have paid \$10,000 to have a guy call me and ask me what I did last week and what the progress of my work is.

Believe me, it is not easy to dedicate several hours of your time each day when you have full time business functioning, and going wrong from time to time.

If you believe that this is something for you, you have the option to get my newest book called

"E-business Success Blueprint" at this link.

[E-Business Success Blueprint](#)

And here is something you are the first to hear about.

If you are interested in my other products, join my Priority Announcement list, so you can be notified when the gate is open. Then I will provide you with the link to the products.

As you will notice at the above link, I'm offering one complete free chapter of my book where I explain in detail how to write a sales letter.

I'm also providing you with the entire chapter of the book to prove that I'm not writing my report or using cheap tricks to get you interested in buying my book based only on the assumptions that it should help you. By getting the sample chapter you will be able to compare its content with products which you have purchased previously so you know if you can use it.

Bear also in mind that my product is not another resale rights book which others are giving away for free or selling cheaply on their sites. My product bears a copyright notice and can't be reproduced without violation of copyright laws.

I'm also explicitly stating that this book can be only purchased from my site. If purchased or obtained from different sites, it is a violation of copyright laws.

Also only those who purchased the product will be able to enter my workshop.

Based on this, you should know that this product won't be flooding the market and be available to anyone for free. You as an exclusive purchaser will have an advantage of upgrading for discount prices on my next volumes of this product.

Only those who pay for it will be able to use it with password protected access.

You will be also automatically subscribed to priority announcement list.

Click here to get the book.

[E-Business Success Blueprint](#)

The book is the first Volume of my work and in the coming months you will see more work coming from me.
